CENTINEL

PRODUCT OVERVIEW

The CENTINEL manual barrier, by incorporating an internal spring balance mechanism, has achieved a compact slim line appearance, that will complement the entrance to a modern office park.

The CENTINEL is constructed to be strong and durable with all balance components shielded within the casing. The barrier is available in both right or left hand operating configurations. The operating lever is designed for comfortable and easy handling of the pole.

The CENTINEL is fitted with a convenient thumbwheel which is used to secure the pole in the horizontal and vertical positions. As an option a camlock can be fitted for locking the thumbwheel.
